IRR	%	11.3	21.7	11,9	21.4	17.0	21.5
Simple payback period	EUR	8.4	5.0	8.2	5.3	6.0	4.7

Bioenergy potential from shelterbelt forests, other protective forest belts and possibility of using this potential

Source of wood fuel	Area, 1000 ha	Total resources, million m ³ *	Period for reconstruction of protective forest belts (use of biomass)	Economic potential of wood fuel
				ktoe/yr
Shelterbelt forests	422.2	63.3	20	446.3
Forest belts alongside of motor roads	44.9	6.8	10	23.7
Forest belts alongside of railways	19.8	3.0	10	15.7
TOTAL	486.9	73.1		485.7

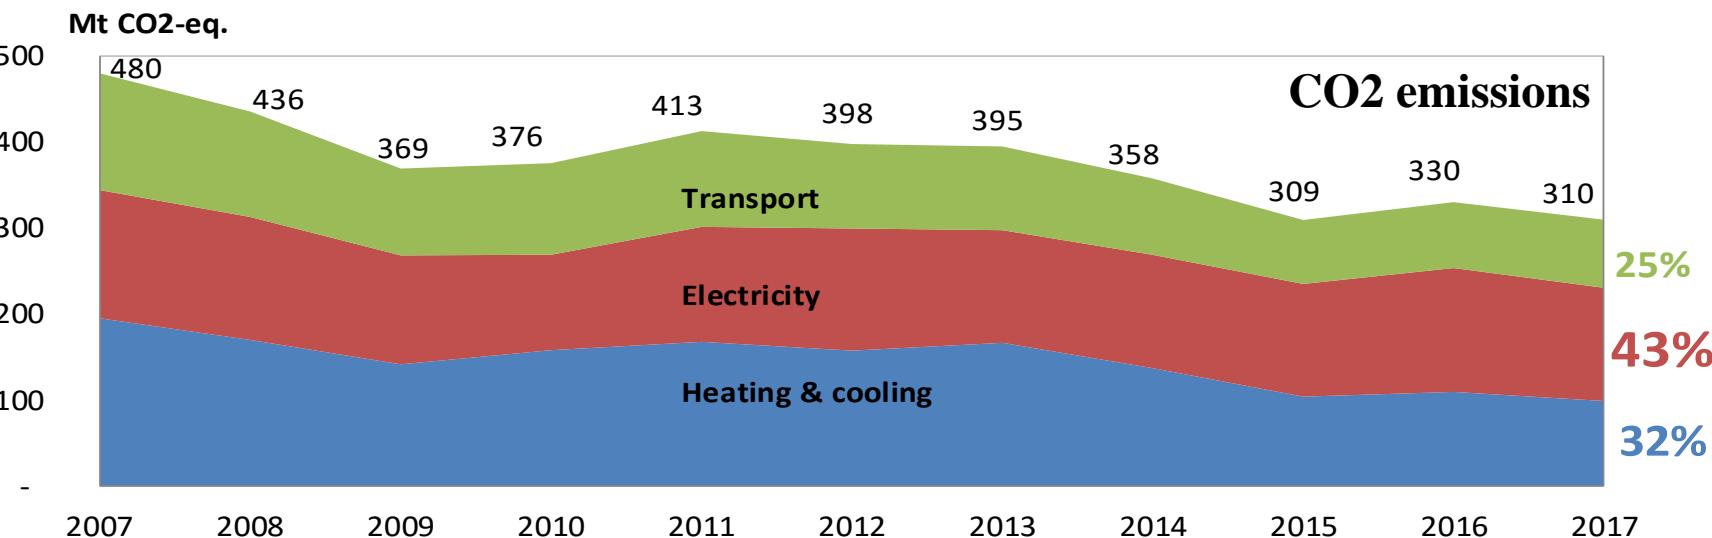

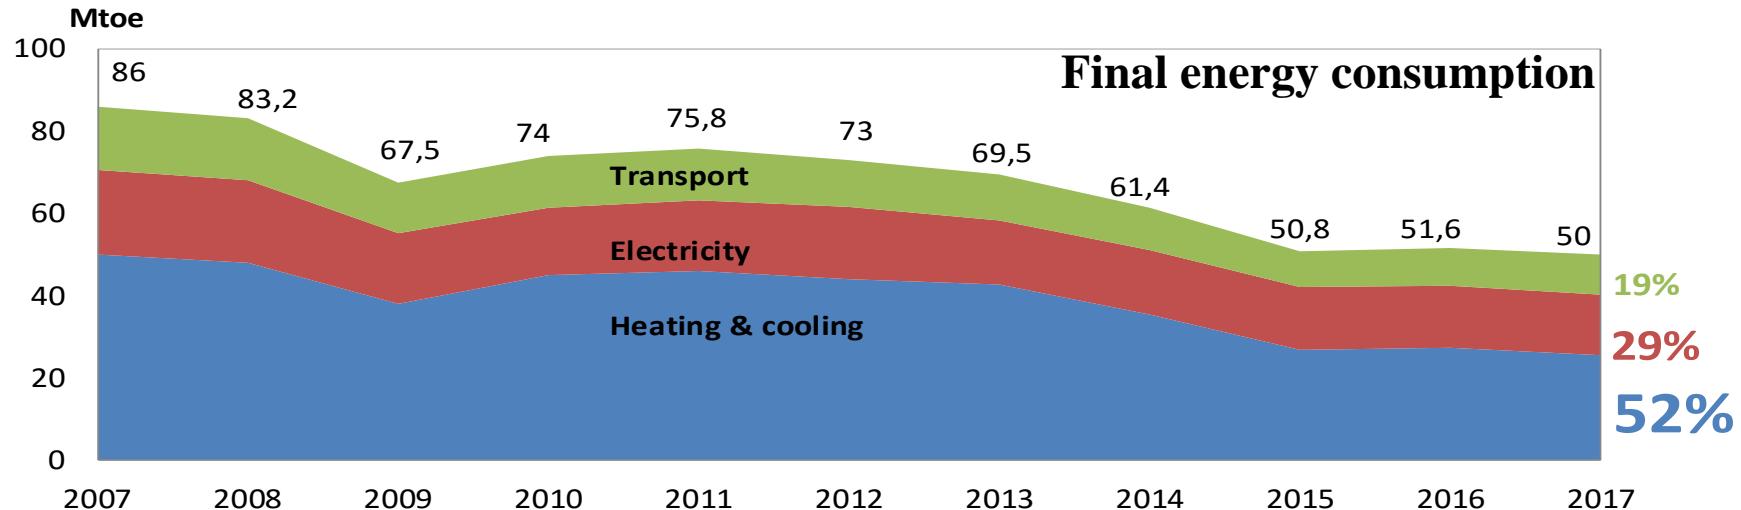

* Assessment based on the yield of fuel (not merchantable) wood – 150 m³/ha.

- ✓ Land under shelterbelt forests was transferred to the ownership of Amalgamated Territorial Communities.
- ✓ Shelterbelt forests and other protective forest belts urgently require reconstruction and renewal!
- ✓ We consider it necessary to develop and adopt **State Program** for the reconstruction and renewal of shelterbelt forests in Ukraine (for example based on the current Concept for the development of agricultural afforestation in Ukraine)

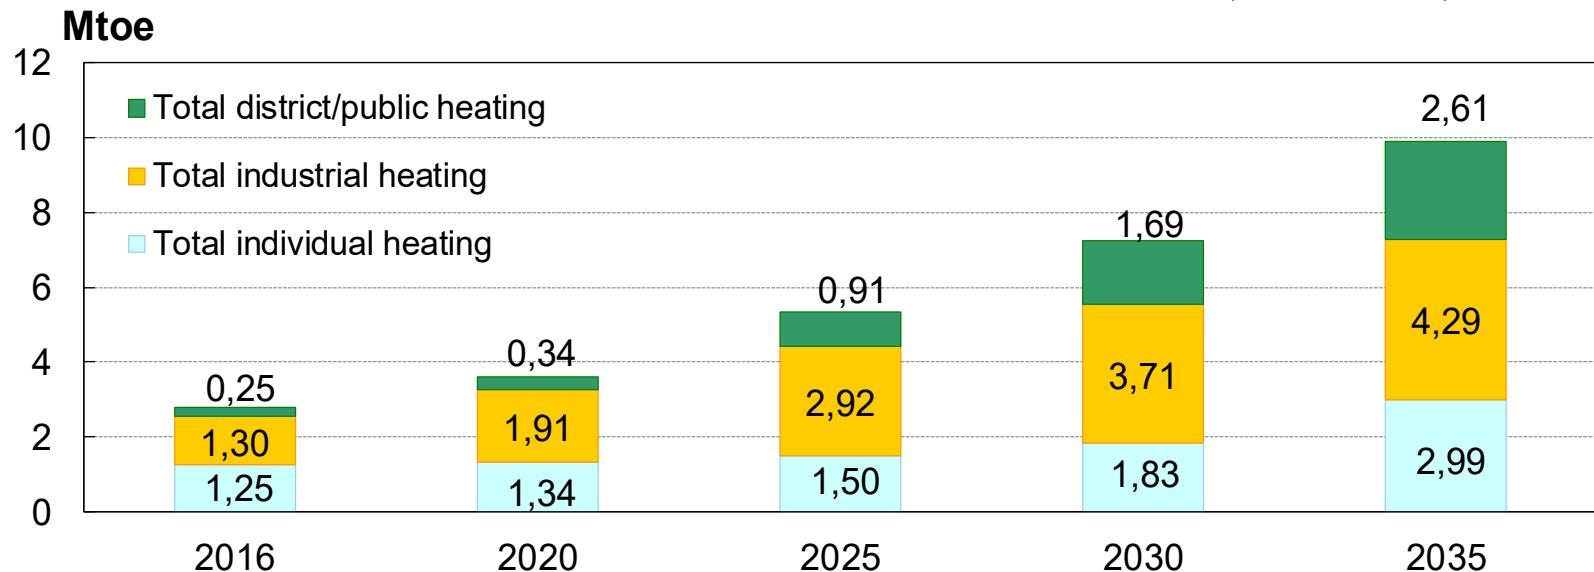

«Energy» is not equal «Electric Energy»

Structure of final energy consumption of Ukraine and CO2 emissions, 2007-2017

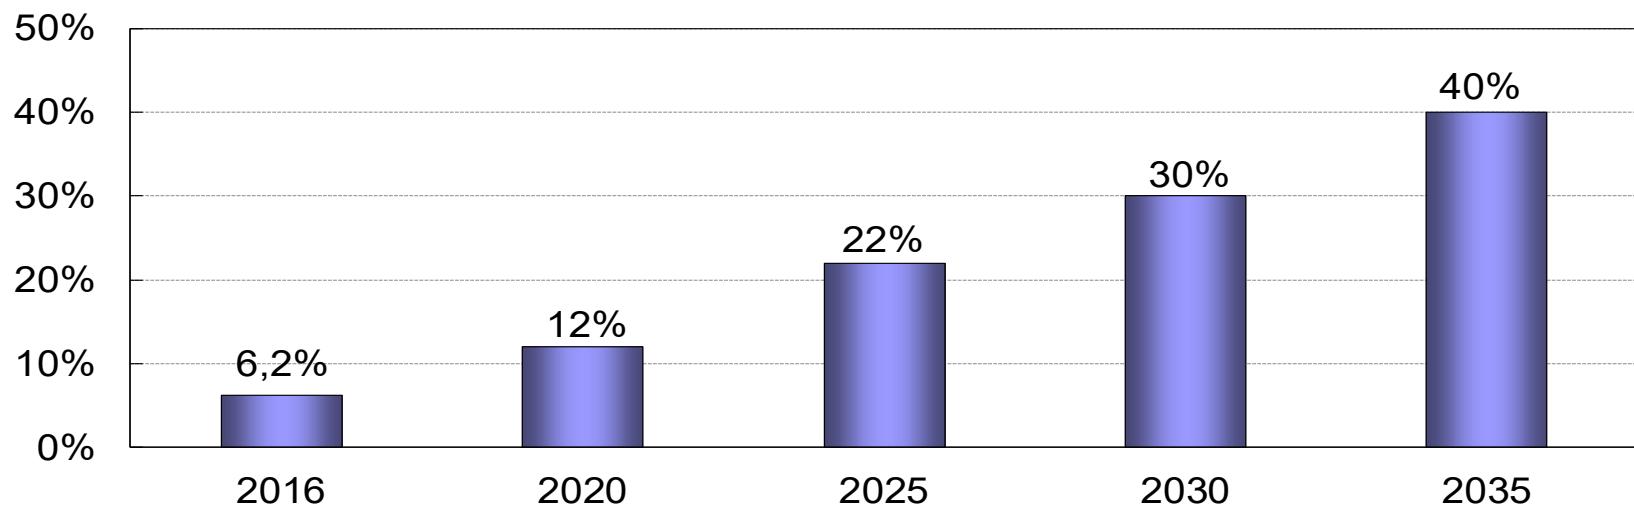

Moving to 40% of Renewable Heat in Ukraine

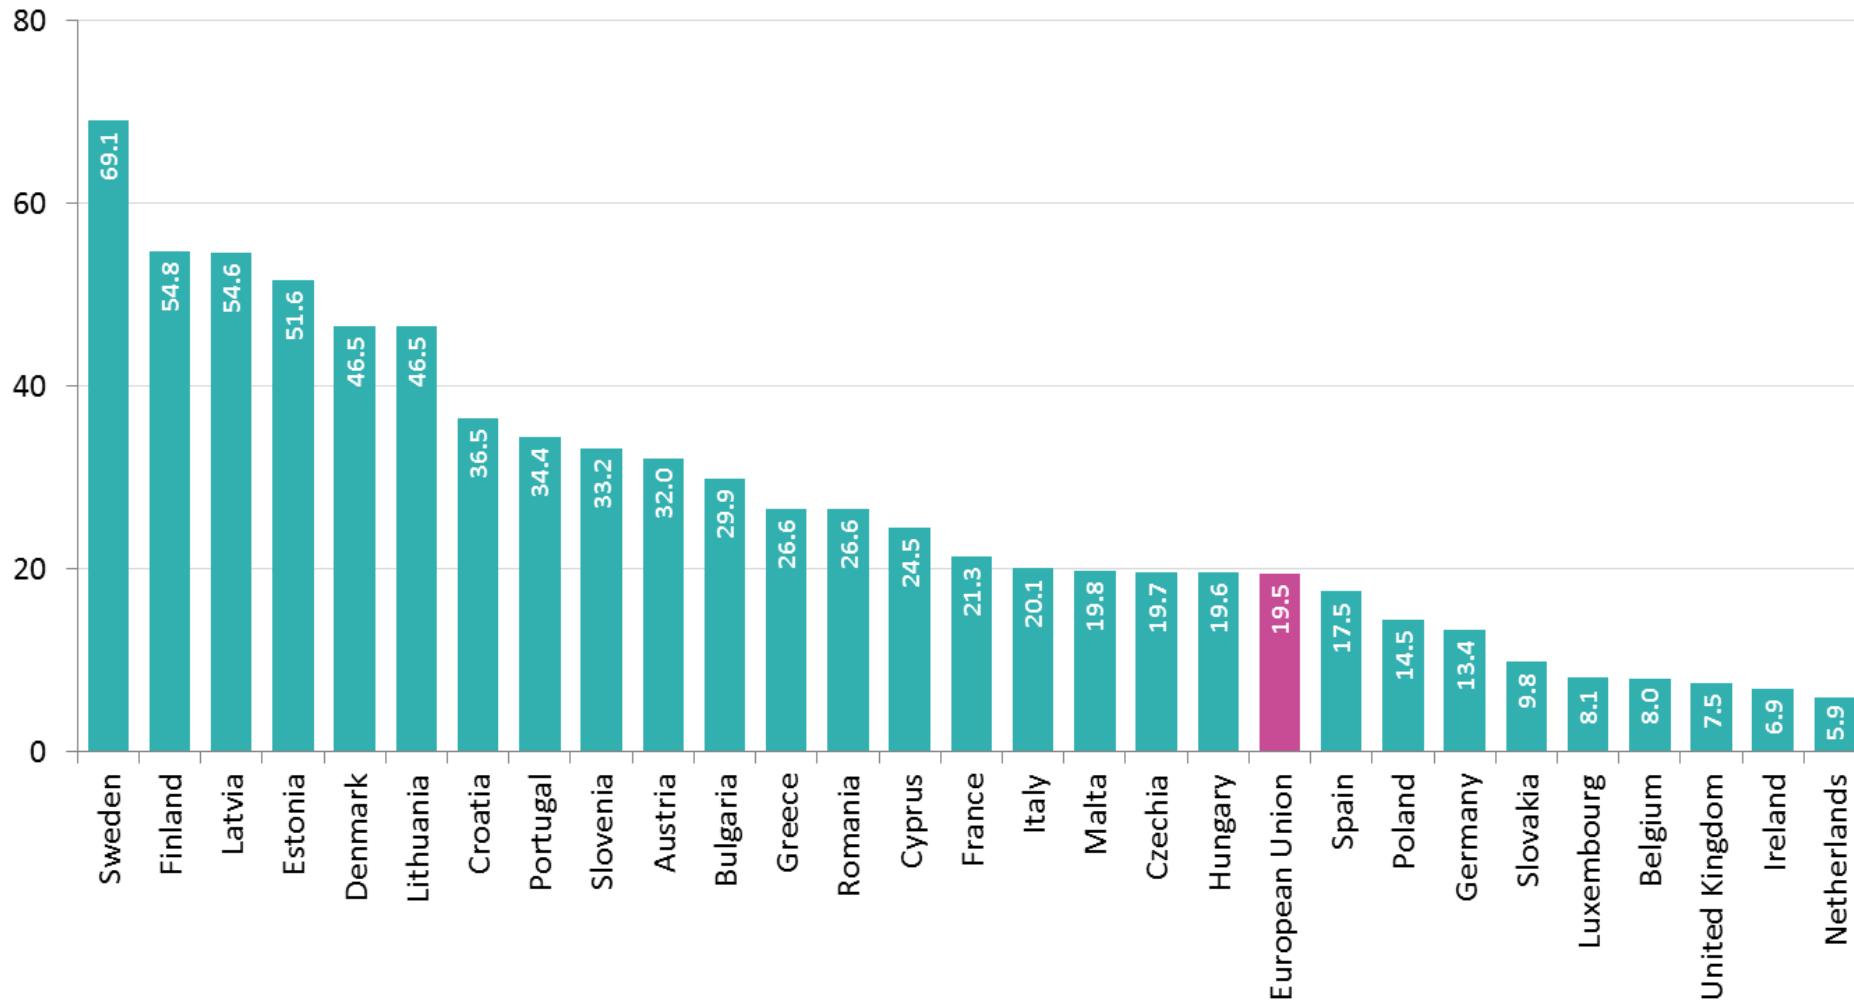

Forecast of Renewable Heat Production in Ukraine (2016-2035)

(TYNDP 20p17 – ENTSOG)

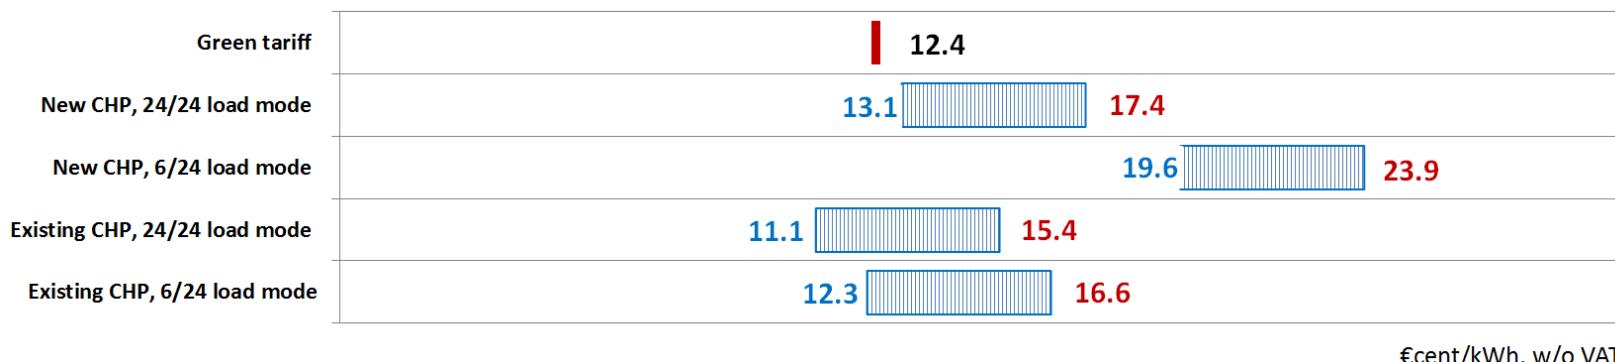

**Biomethane potential in Ukraine in 1000 Nm³ -
7.8 bln m³ CH₄ or
25% of NG consumption (2018)**

Biomethane cost in comparison with fossil fuels alternatives

Biomethane as fuel

Biomethane for power/heat production

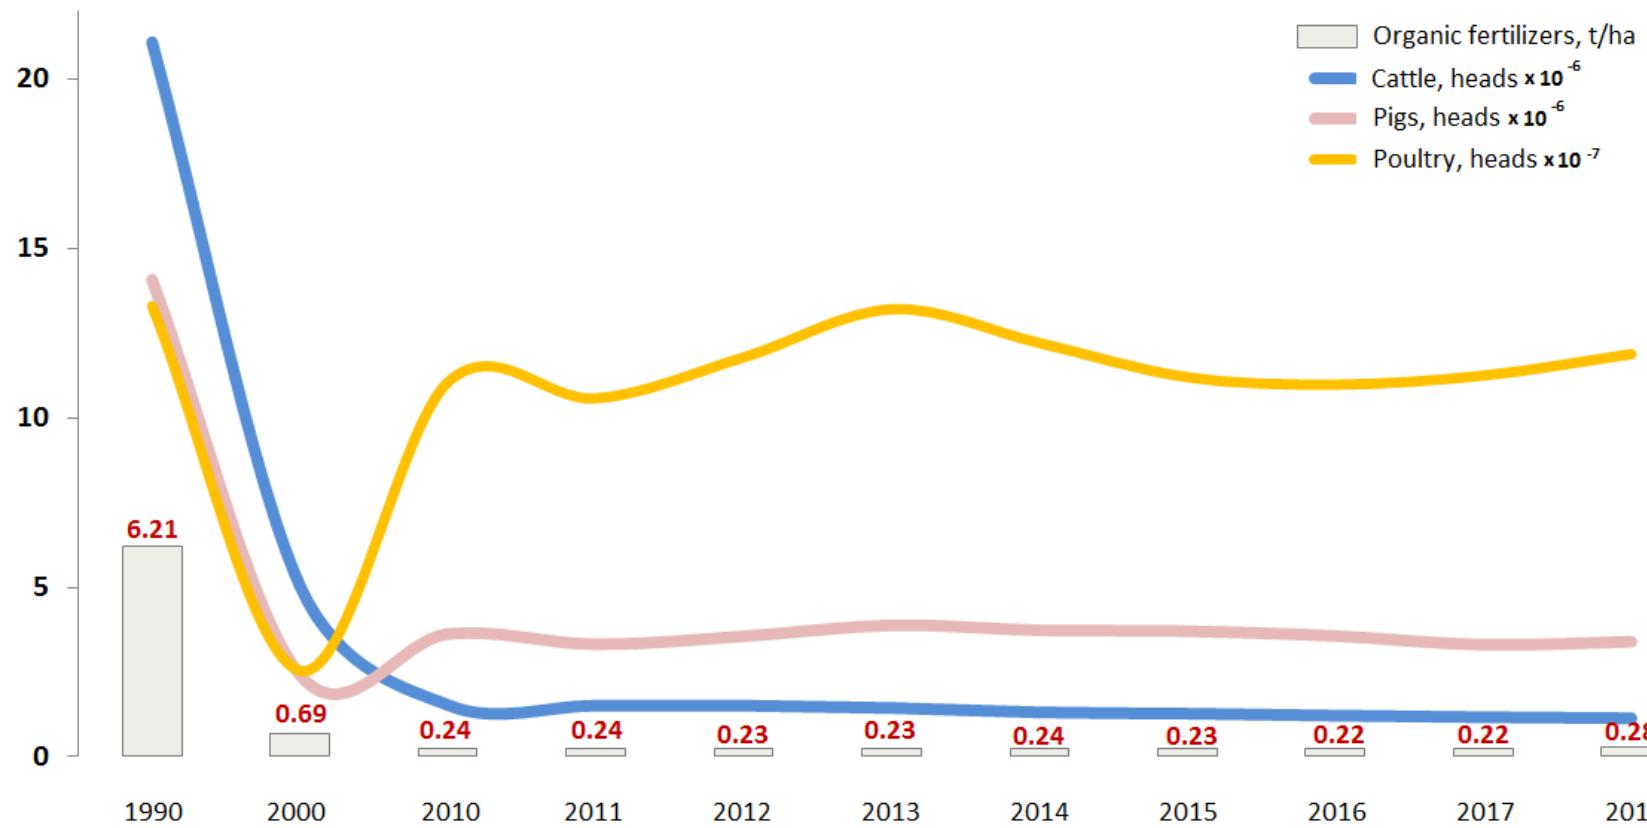

Possibility of biomethane stimulation through feed-in-tariff for electricity from biomethane

Changes in the Law of Ukraine "On amendments to the law of Ukraine "On Alternative Energy Sources“ are needed

Categories of energy units	Green tariff, EUR/kWh without VAT
For electricity produced from biomethane with more than 60% of heat utilization by unit with installed electrical capacity > 5 Mw _e (new CHP)	0,140
For electricity produced from biomethane with more than 60% of heat utilization by unit with installed electrical capacity < 5 Mw _e (new CHP)	0,160
For electricity produced from biomethane with more than 60% of heat utilization (existing CHP)	0,123
For electricity produced for regulation purpose during peak load hours (6/24, new CHP)	0,20 - 0,24
For electricity produced for regulation purpose during peak load hours (6/24, existing CHP)	0,123

Bioenergy is a Source of Organic Fertilizers for Organic Farming

- Anaerobic digestion is one of the most rational ways to convert organic matter into organic fertilizers
- The introduction of organics with food by-products, the organic part of MSW, etc., would compensate for the reduction of manure due to the fall in the number of animals in Ukraine
- Existing methods of digestate pretreatment before the use as fertilizers make it possible to ensure a complete cycle of organic turnover in a sustainable and environmentally sound manner

Ukraine has prospects for the production of bioethanol!

Existing preconditions:

- Idle sugar mills and alcohol plants can **produce bioethanol**.
- Production of bioethanol can be **profitable** with payback period of 5-6 yr and IRR > 20%.
- Under certain conditions (use of molasses as feedstock, use of biomass heat in the production process etc.) first-generation bioethanol may meet CO₂ reduction requirements: **60%** for installations put into operation after 05.10.2015 (RED II, draft Law of Ukraine № 7348 of 29.11.2017).

What shall be done:

- To reconsider (or postpone) **requirement for CO₂ reduction** in draft Law of Ukraine № 7348 of 29.11.2017.
- To adopt **draft Law of Ukraine № 7348** of 29.11.2017 which:
 - Sets **targets** for presence of liquid biofuels in Ukraine's market (in energy %). Bioethanol: not less than 3.4% from 01.01.2019 and 4.8% from 01.01.2020; biodiesel: not less than 2.7% from 01.01.2019.
 - Introduces **sustainability criteria**: requirements for CO₂ reduction and restrictions for feedstock origin (land use and protection, biodiversity).

Prospects of energy utilization of municipal solid waste

Project type	MBT with biogas production	MBT with SRF production for cement industry	Production of SRF for energy use (DH)	MSW incineration with energy use
CAPEX, €/(t/yr)	200–400	150–300	400–600	500–1000
MSW treatment cost, €/t	30–80	25–60	80–100	90–150
Potential income, €/t	30–50	0–(5)	40–75	40–75
MSW treatment tariff (gate fee), €/t	0*–40	25–60	40–50	50–100

* - for electricity and thermal energy commercial use

MSW management tariff (2018): 87,4-116,7 UAH/m³ (total), including 60,2 – 83 UAH/m³ (for transportation) and 27,2-33,7 UAH/m³ (for landfilling); or

16-22 €/t (total), including 11 –16 €/t (for transportation) and 5-6 €/t (for landfilling)

At MSW generation rate 350 kg/year per person allocation 1% of average household resource for solid waste service, the tariff corresponds to 1316 UAH/t (or **41 EUR/t**), including 11 –16 €/t (for transportation) and **25-30 €/t (for gate fee)**.

This value corresponds to monthly fee of 99 UAH per household or 38 UAH per person.

Auctions are more profitable for bioenergy projects than green tariffs

Feasibility Study of Biogas Plant 2 MW (maize silage – 35%, pig manure – 65%)

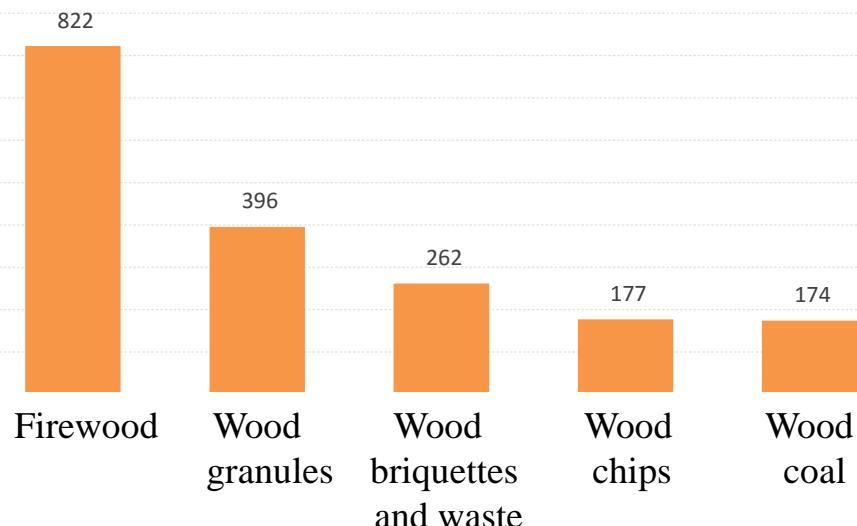

Project parameters	Model	
	Green tariff	Auctions
Electricity tariff, cents/kWh (w/o VAT)	12,39 (by end of 2029) 6,0 (from 2030)	11,15 (for 20 years)
CAPEX, mill €	5.74	5.74
CAPEX, €/kW _{el}	2 700	2 700
NPV, th. €	1 833	3 364
IRR, %	14.2%	15.3%
SPP, years	5.5	6.5

Ukraine exports 2.38 million tones of solid biofuels per year, equivalent to 0.7 billion m³ of natural gas/ year

Export of solid biofuels from Ukraine
in 2018, in thousand tons

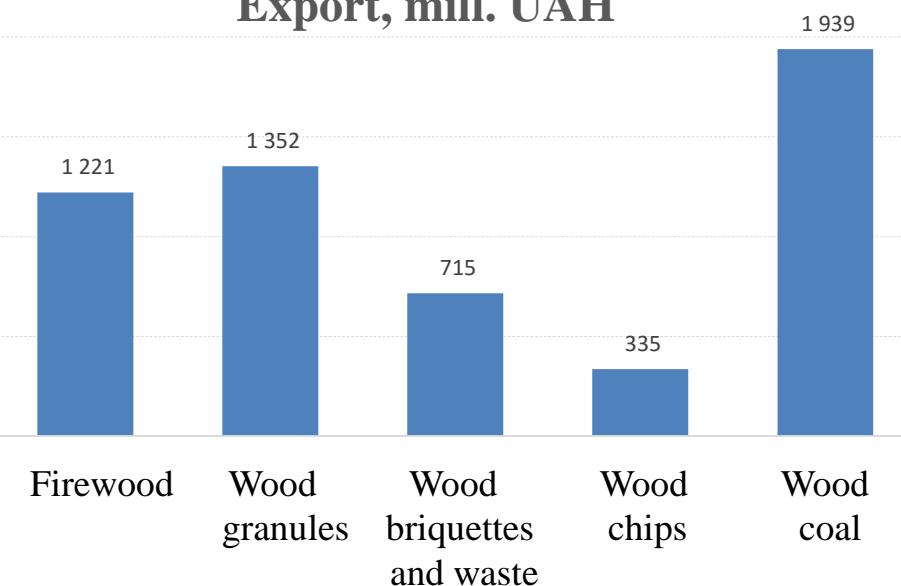

Total: 2.38 million tons

Export, th. t

Export of solid biofuels from Ukraine
in 2018, in million UAH
Total: 6.48 billion UAH

Export, mill. UAH

Priorities for improving normative and legal basis of bioenergy

Introduction of the system for electronic trade of solid biofuels. Draft Law of Ukraine has been developed jointly with the State Agency on Energy Efficiency and Energy Saving of Ukraine.

Introduction of competition in district heating systems. Draft Law of Ukraine has been developed jointly with the State Agency on Energy Efficiency and Energy Saving of Ukraine.

Development of stimulation mechanisms for power production facilities based on biomass, biogas and biomethane for the operation in **balancing facility market**.

Development of a stimulation mechanism for the production and consumption of **biomethane** for feeding into gas network and for use in the transport sector.

Development of a stimulation mechanism for the **growing and use of energy crops** in Ukraine.

Development of a stimulation mechanism for the **production and use of liquid biofuels and biogas in the transport sector** in Ukraine. It is necessary to adopt draft Law of Ukraine № 7348.

It is necessary to amend Law of Ukraine «On heat supply» as for **setting tariffs for heat from alternative energy sources**.

It is necessary to **repeal CO₂ tax** for biomass/biogas boiler plants and TPP/CHP plants.

Project «Promoting the penetration of agribiomass heating in European rural areas»

*Funded through EU Program Horizon 2020
Duration: January 2019 – December 2021*

Consortium: 13 partners from 9 European countries (Greece, Spain, Austria, Denmark, Belgium, Croatia, Romania, **Ukraine**, France).

Coordinator: Centre for Research and Technology Hellas (CERTH, Greece).

Bioenergy Association of Ukraine (UABio) is a project partner from Ukraine.

In AgroBioHeat, among others, UABio is Leader of Task 5.2 «National Strategic Plan», Task 5.3 «National policy workshops & Advocacy actions», and is primarily responsible for the preparation of a booklet on «**Maize Residues-to-Energy**».

Through its activities, AgroBioHeat aims **to raise confidence on agribiomass**, empower local stakeholders to unblock the market and influence the development of the European and national framework in a way that is favourable to **agribiomass heating solutions** market uptake. Actions will be mainly located in **6 European countries**: Greece, Spain, France, Romania, Croatia and **Ukraine**.

Horizon 2020 Project “Promoting Sustainable Use of Underutilised Lands for Bioenergy Production through a Web-Based Platform for Europe”

Duration: 1 Nov 2018 – 31 Oct 2021

Consortium: 12 partners from 10 European countries (Germany, Italy, Hungary, Austria, **Ukraine**, Spain, Romania, Belgium, Netherlands, Finland).

Coordinator: WIP-Renewable Energies (WIP) Wirtschaft & Infrastruktur GmbH & Co Planungs KG

BIOPLAT-EU will produce a comprehensive online web-based platform for supporting the decision-making process for new bioenergy investment projects that rely on biomass from marginal, underutilized and contaminated lands in Europe and Ukraine.

Project «REnewable GAs TRAde Centre in Europe»

*Funded through EU Program Horizon 2020
Duration: 36 months (June 2019 – May 2022)*

Consortium: 15 partners in 10 countries: ISINNOVA, CIB (IT), EBA, AIB, ERGaR, Fluxys (BE), RFGI (IE), DENA, DBFZ (DE), AGCS (AT), Elering (EE), UPEBI (PL), ARBIO (RO), NEDGIA (ES), Amber (LT).
12 EBA (European Bioenergy Association) Linked Third Parties + **5** ERGaR (European Renewable Gas Registry) Linked Third Parties

Bioenergy Association of Ukraine (UABio) is linked to EBA and involved in the task «Support for biomethane market uptake»

REGATRACE project aims creating an efficient trade system based on issuing and trading biomethane/renewable gases Guarantees of Origin (GoO). This objective will be achieved through the founding pillars: - European biomethane/renewable gases GoO system - Set-up of national GoO issuing bodies - Integration of GoO from different renewable gas technologies with electric and hydrogen GoO systems - Integrated assessment and sustainable feedstock mobilisation strategies and technology synergies - Support for biomethane market uptake - Transferability of results beyond the project's countries.

Welcome to Ukraine and to UABio!
