My contribution to the energy transition:

- Development of elements of Green Energy Strategy of Ukraine till 2050
- Biogas-to-hydrogen for grid balancing in Ukraine
- Increasing of added value of agrarian companies through development of biomass residues value chain

How national and EU energy policy could increase the impact of my work / my project

- *Introduction of biomass stock exchange;*
- *Guaranteed access of third-party based on renewable generation to existing district heating network;*
- *Introduction of energy/carbon tax on the state and international level;*
- *Cancellation of any artificial subsidies for fossil fuels;*
- *Implementation of base principles of renewable gases (biomethane and “green” hydrogen) trading between Ukraine and the EU-28;*
- *Establishing of 100% renewable energy target till 2050*

Establishing of “100 RE Ukraine”
