

### BIOMETHANE DATA LEGEND

Country - Facility number  
Previously installed (yellow) / Newly added (red)

Location of biomethane production facility  
Previously installed biomethane plant (yellow) / Newly added biomethane plant (red)

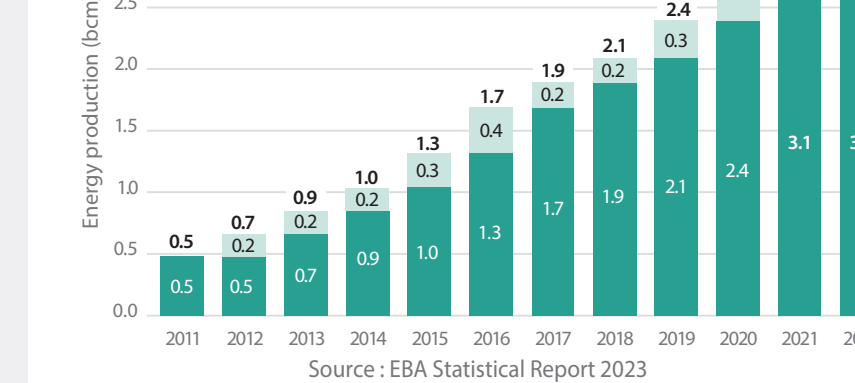

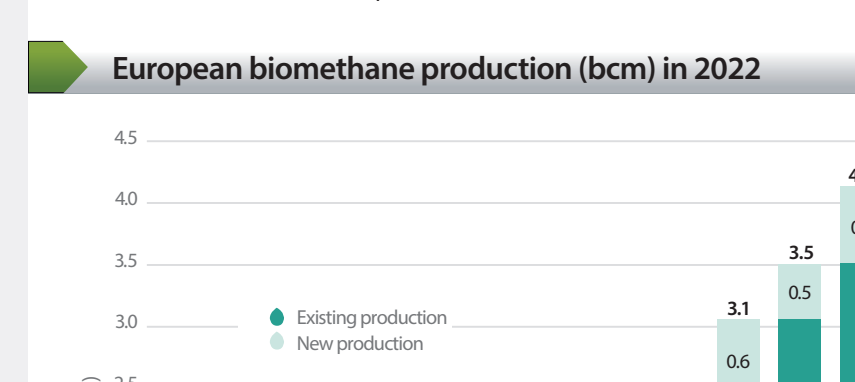

### MAP LEGEND

European country producing biomethane  
Not producing biomethane / no data available

Cross-border / interconnection points  
operational / planned  
transport by pipeline (under 24" / 24" to 30" / 30" and over)

Cross-country or intra balancing zone point  
operational / planned

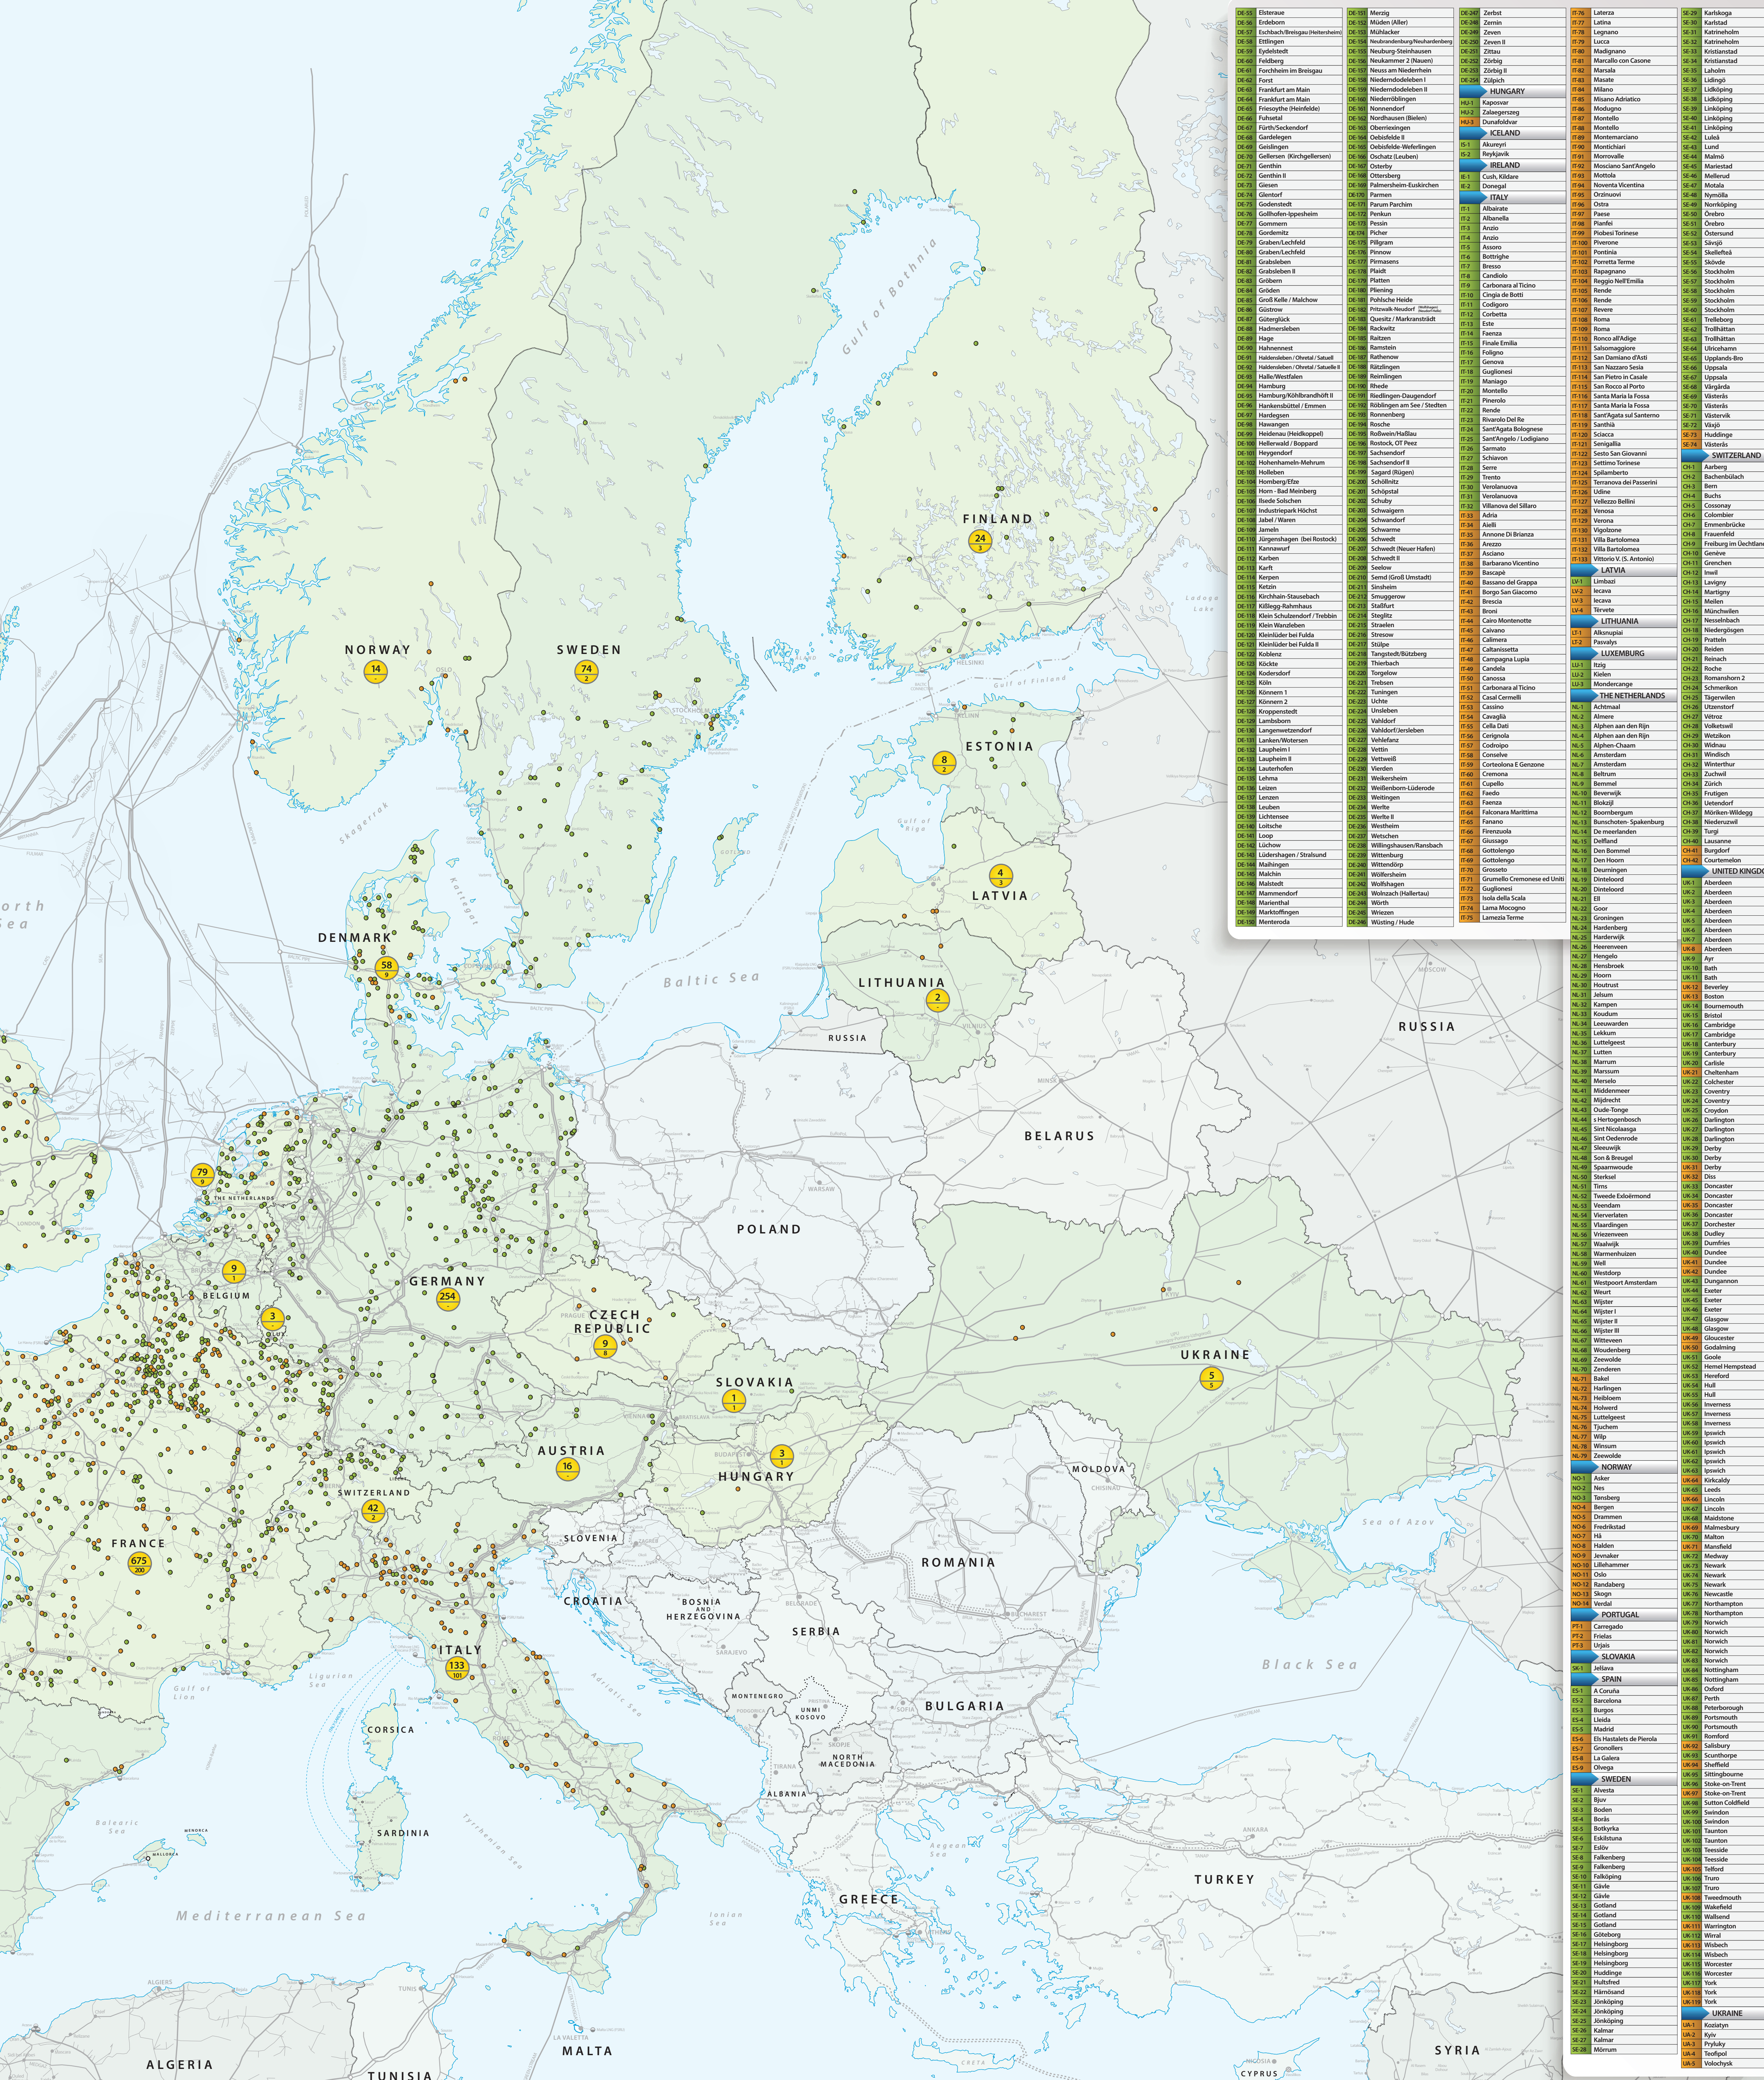

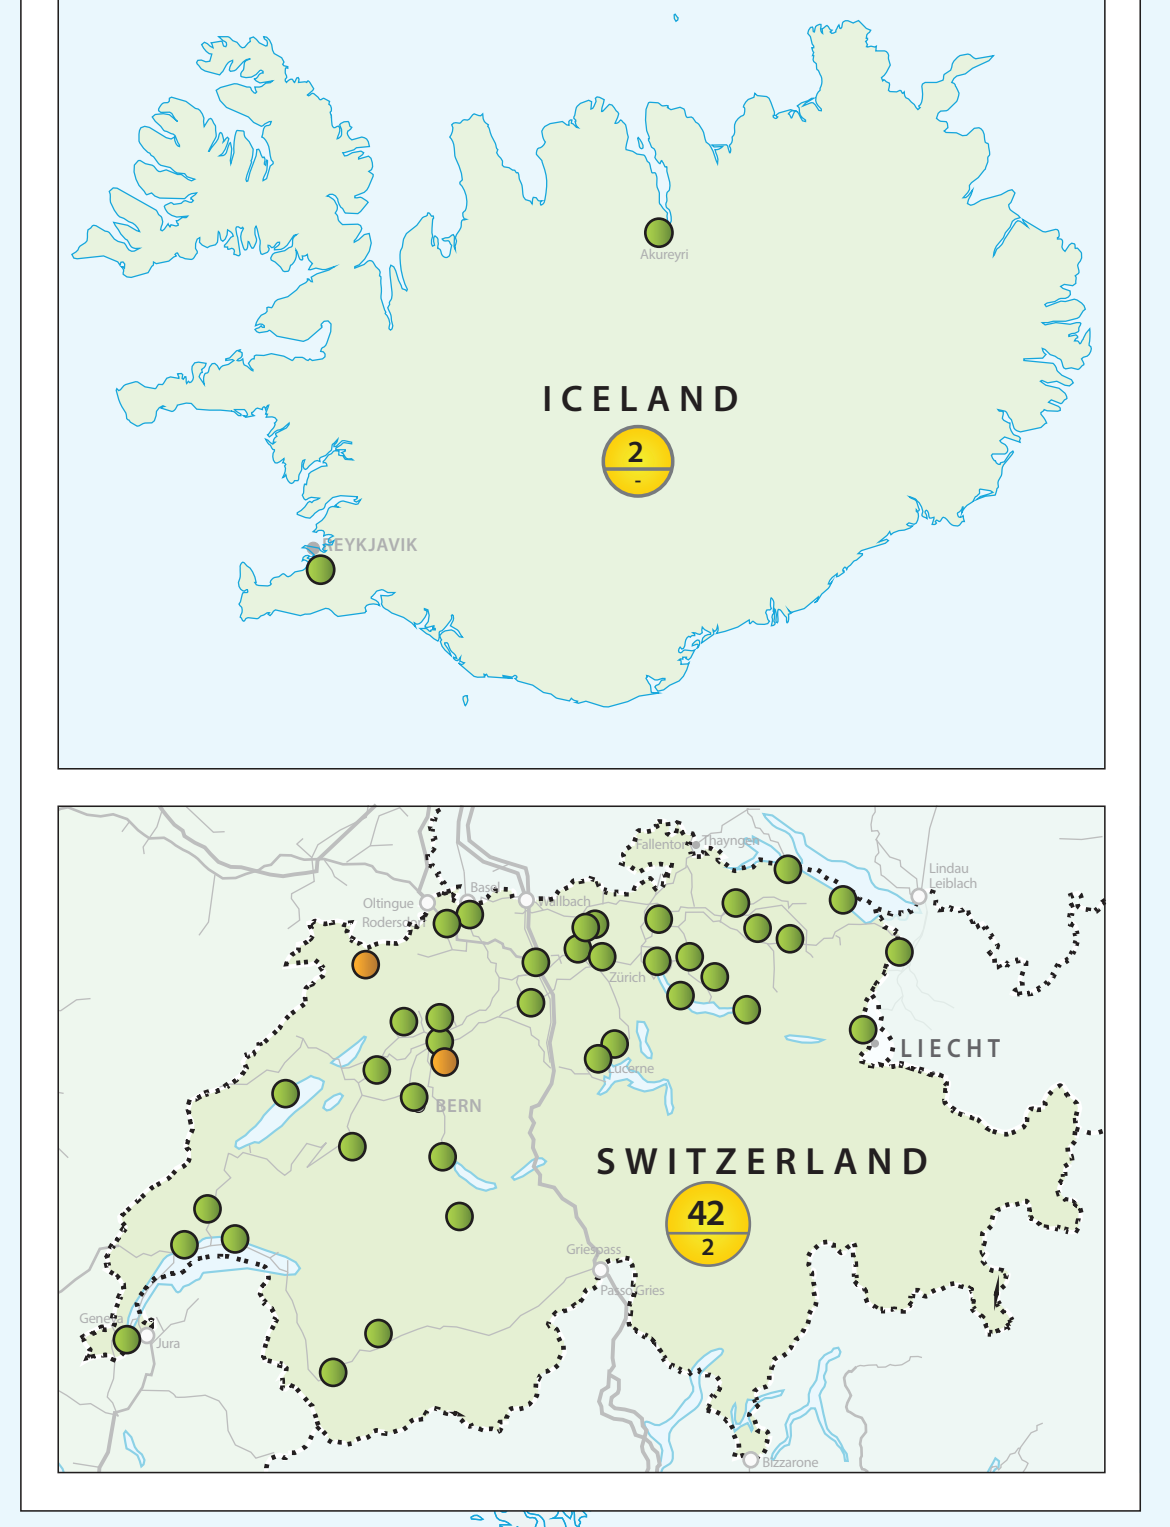

The European biomethane market  
Europe reaches a total of 1,548 biomethane producing facilities by June 2024 (Figure 1). Compared to the previous editions of the European Biomethane Map, the number of plants in Europe have steeply increased (483 plants in the 2018 edition, 729 in the 2020 edition, 1,023 in the 2021 edition and 1,322 in the 2022-23 edition).  
58% of the biomethane plants currently active in Europe are known to be connected to the distribution grid and 17% are known to be connected to the transport grid. 9% of European biomethane plants do not have a grid connection, and for the remaining 16% of presented plants no information is available in the EBA database.

DATA SOURCES  
This map has been built with support of the EBA members, who have provided the necessary data, and EBA Secretariat. Sources for each country are listed in this section.  
Data is covering active facilities under operation, according to available data by June 2024. Availability of data depends on the country. Many more plants are planned or under construction.  
Additional information is available in the EBA statistical report 2024.
