

# Annual Activity Report

UABIO

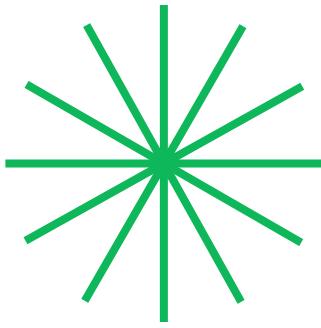

We are greening  
the energy

[uabio.org](http://uabio.org)  
[info@uabio.org](mailto:info@uabio.org)

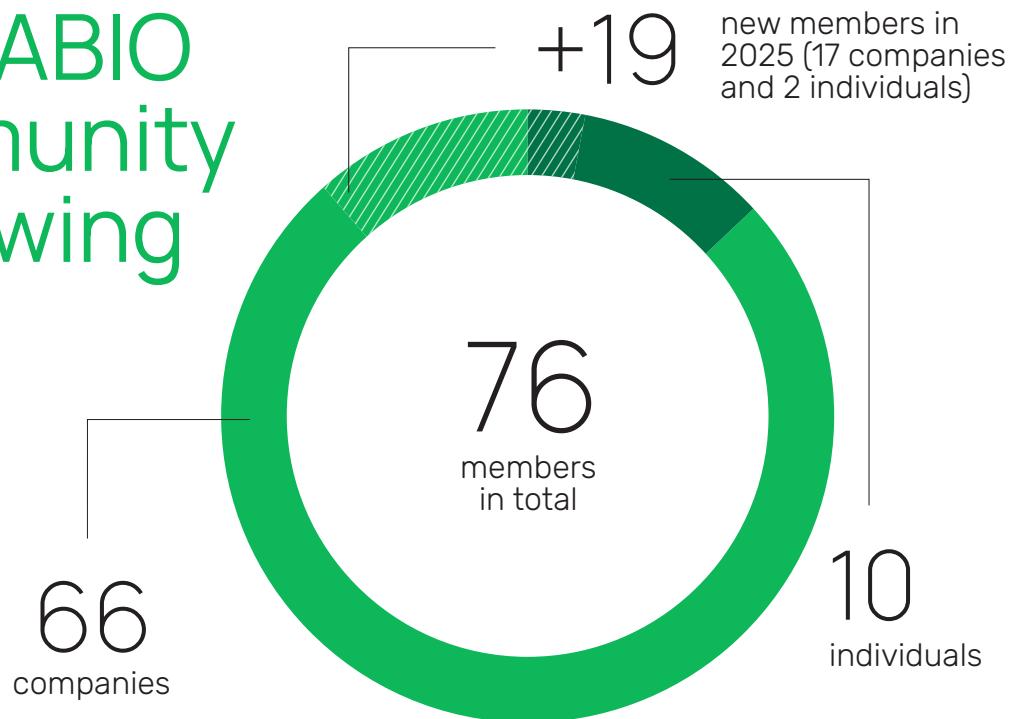

# WHY JABIO?

- 1 A professional community uniting national market leaders and established international companies
- 2 Representation and advocacy of members' business interests
- 3 Strategic cooperation with key governmental and business institutions in the bioenergy sector
- 4 Participation in the development of legislative and regulatory initiatives
- 5 Expansion of professional networks through engagement with potential partners and clients
- 6 Enhanced visibility and promotion of member companies within the professional community
- 7 Access to in-depth analytics, specialised reports, presentations, and expert insights from the Association

# Legislation and Advocacy

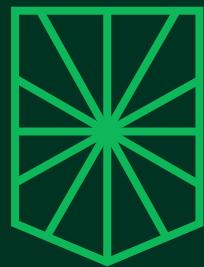

Signing of a **Memorandum of Cooperation between the Ministry of Agrarian Policy and UABIO**. Launch of cooperation in the field of bioenergy, in particular to promote the development of biogas and biomethane production and use in the agricultural sector, as well as to strengthen Ukraine's bioenergy sector.

Establishment of the **Coordinating Council on the Development of Agricultural Bioenergy Potential**, with UABIO's participation in the Council's regular meetings.

## Key Legislative Proposals Submitted by UABIO

Initiative Title	Brief Description	Status of Consideration
Draft Law on Simplifying the Export of Ukrainian-Produced Biomethane to Global Markets (№13395)	<i>Exemption allowing export of Ukrainian-produced biomethane to countries outside the Energy Community without export duties</i>	 Registered in the Verkhovna Rada of Ukraine
Proposals to the Draft Law of Ukraine "On the Timber Market" (№ 13227-ð)	<i>UABIO proposals for guaranteed access to wood sources for producers of thermal and electric energy</i>	 Registered in the Verkhovna Rada of Ukraine <small>Proposals submitted to the Committee on Economic Development and the Coordinating Council on the Development of Agricultural Bioenergy Potential</small>
Draft Law on Amendments to Certain Laws of Ukraine on Improving Competitive Conditions for Electricity Generation from Alternative Energy Sources (№13219)	<i>UABIO proposals for the improvement of auction procedures for support quotas and tariff formation for heat from alternative energy sources</i>	 Registered in the Verkhovna Rada of Ukraine <small>Submitted to the Committee on Energy and Housing and Utilities of Verkhovna Rada of Ukraine, and the Ministry of Energy</small>

# Key Achievements and Case Studies

- ✓ Registration of draft laws in the Verkhovna Rada of Ukraine and submission of proposals thereto
- ✓ Export of the first batch of Ukrainian-produced biomethane to Europe via pipeline transportation
- ✓ Five biomethane plants operating in Ukraine

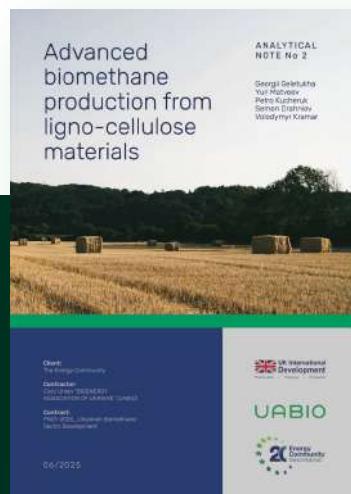

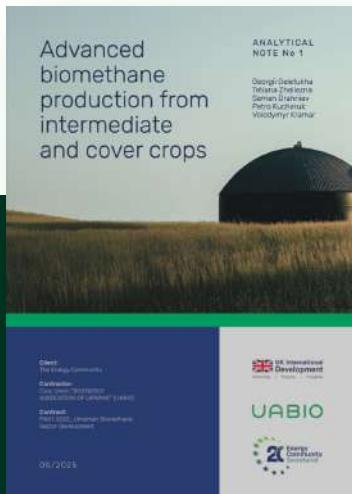

## Further Advocacy Focus Areas:

- ✓ Ensuring synchronization of the Ukrainian Biomethane Register with the UDB and providing Ukrainian producers with access thereto
- ✓ Amending the Gas Transmission System Code or adopting a **Technical Regulation for Natural Gas** to reduce the requirements for the higher heating value of biomethane
- ✓ Establishing **dialogue with the Government of Germany** regarding the export of Ukrainian biomethane
- ✓ Exemption from carbon dioxide emissions tax for entities using biofuels (Draft Laws No. 9596 and No. 9597 dated 9 August 2023)
- ✓ Improving access to wood sources and enhancing the mechanism for tariff formation for heat produced from alternative energy sources

Over  
**50**  
advocacy  
letters  
submitted  
to public  
authorities

EVENT OF THE YEAR

# Biomethane in Ukraine: Opportunities and Development

OFFLINE CONFERENCE

During the conference, the economic feasibility and financing models of biomethane projects, environmental benefits and sustainability aspects, as well as challenges and opportunities for the growth of the biomethane sector in Ukraine were highlighted. Thematic case studies of successful biomethane production projects in Ukraine were presented to demonstrate the potential of this sector.

Biomethane in  
Ukraine: Opportunities  
and Development  
Conference

100+ participants    20+ speakers    3 sessions

# EVENTS

Organised  
by the UABIO

## **UABIO Friday (5 editions)**

UABIO Friday is a webinar format featuring a single speaker and aimed at an in-depth discussion of a selected topic. Available to all members of the Association.

## **Training “Biomethane Production Worldwide. Development of Biomethane Production in Ukraine”**

A comprehensive training programme for all those interested in gaining deeper knowledge of biomethane production.

## **Three Webinars within the BIOPART Project**

Introduction of new knowledge and practices to promote the dissemination of biogas solutions, including biomethane production.

## **Roundtable on Biomethane Production and Use as Motor Fuel in Ukraine**

Discussion of the future of biomethane as a motor fuel in Ukraine, including key challenges and prospects for the sector.

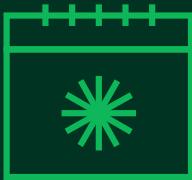

## **Webinars within the Project “Technical Assistance for the Export of CBAM Goods from Ukraine to the EU”**

Explanation of new approaches driven by the European Green Deal and preparation of Ukrainian producers for the full implementation of the Carbon Border Adjustment Mechanism (CBAM).

# EVENTS

with UABIO Participation as a  
Speaker or Partner

## **Business Transformations of the Ukrainian Agricultural Market**

Discussion of the biomethane market, launched projects, the legislative framework, as well as the prospects and barriers of the sector.

## **Serbian Biogas Conference**

Discussion of the latest trends, challenges, and opportunities in the biogas and biomethane sectors across Europe. UABIO delivered a presentation entitled "Ukraine's Path to Biomethane: From Idea to Reality"

## **Danish-Ukrainian Agrotechnology Business Conference**

The Chairman of the Board of the Association, Georgii Geletukha, moderated a session and delivered a presentation on biomethane in Ukraine.

## **Budapest Biogas Summit**

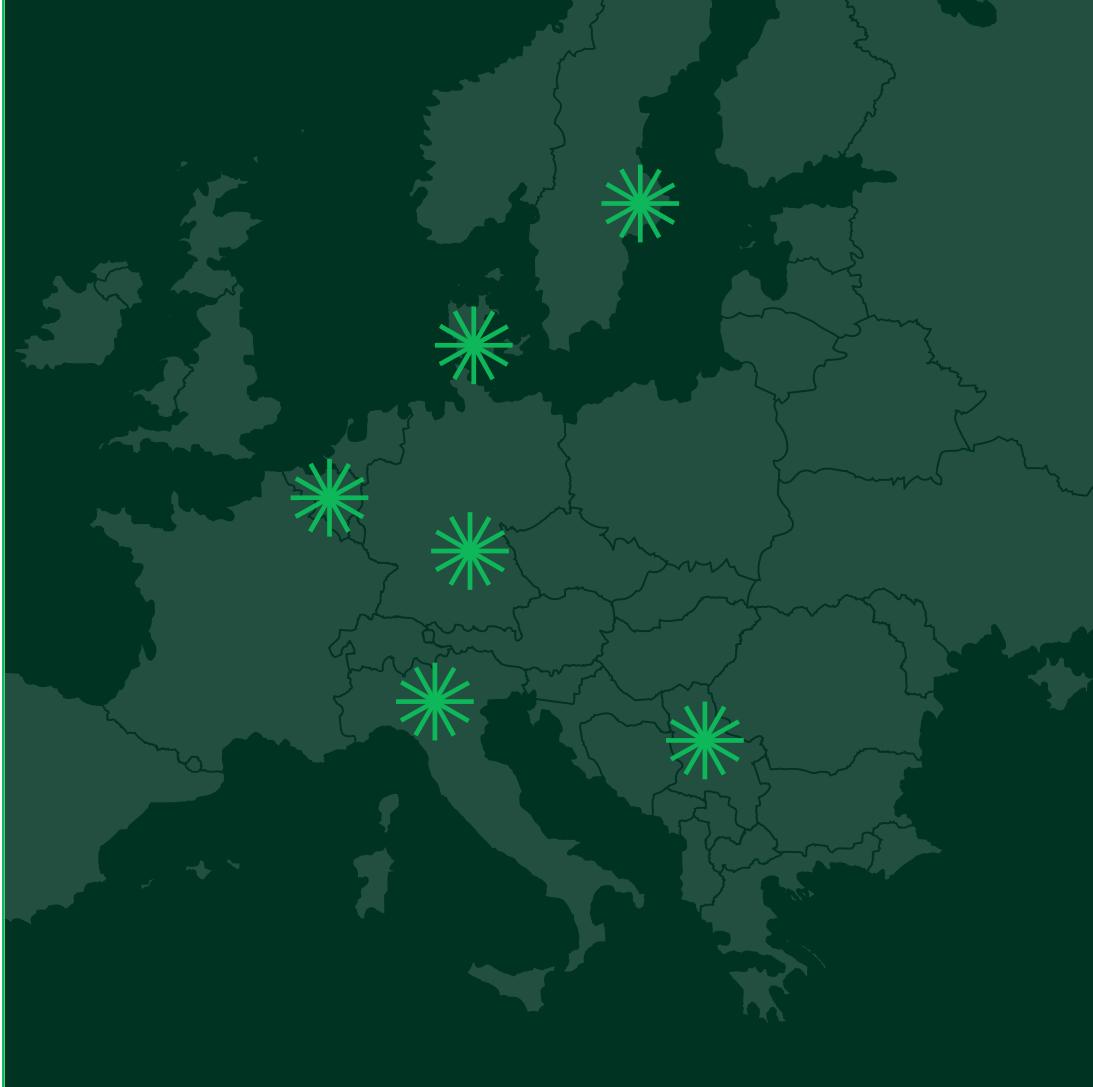

A major event bringing together representatives from various industries to discuss the potential and challenges of the biogas and biomethane sector in Central and Eastern Europe.

## **ENERGOTECH Conference: How to Prepare an Enterprise for the Winter of 2025–26?**

Discussion of practical recommendations for ensuring sustainable energy supply for industrial enterprises.

# INTERNATIONAL EVENTS

UABIO Members and Experts  
Participated in International Events

**Biofuels in Maritime Transport:  
UABIO in Copenhagen**

**UABIO Experts at a  
Biomethane Plant in Denmark**

**Study visits within the  
implementation of the  
BIOMETHAVERSE project**

**Study visits within the  
implementation of the BioPart  
project**

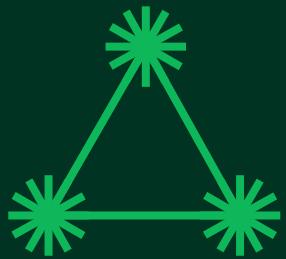

**Study visits within the  
implementation of the KVP  
project**

# Key Projects and International Cooperation in 2025

## Seafairer

Sustainable energy and alternative fuels based on advanced technologies for intermediate renewable energy carriers.

The project will demonstrate the production of low-carbon biofuels for maritime transport using VINTER intermediate pyrolysis technology. A comprehensive study of liquid biofuel is planned, including a demonstration sea voyage of a vessel powered by it.

## KVP Ukraine Project

Chamber and Association Partnership Programme.

The project aims to optimize UABIO's operations, positioning, and communication strategy in order to demonstrate the tangible benefits of biogas business development, which contributes to sustainable development in Ukraine.

## Innovations in the BIOMETHAne uniVERSE

Demonstration and integration of production innovations within the BIOMETHAne uniVERSE

The BIOMETHAVERSE project aims to demonstrate cost-effective and innovative biomethane production technologies, reduce greenhouse gas emissions, ensure the scalability and replicability of technological solutions, support their market uptake, and develop science-based recommendations for public policy, as well as the dissemination of results in line with the sustainable development goals.

## Innovate Ukraine Energy Partnership

Development of a business model for biomethane production in Ukraine

The project aims to provide a comprehensive techno-economic assessment of biomethane production in Ukraine, identify its regional potential, and develop a national biomethane roadmap to 2035 with a long-term outlook to 2050. The project also focuses on the analysis and improvement of the regulatory framework to remove existing barriers, in particular those related to the use of biomethane in the transport sector.

# COMMUNICATIONS AND OUTREACH

Follow Us on  
Our Channels

Our team continuously works to enhance the effectiveness of communication, delivering timely and reliable information in the field of bioenergy.

In 2025, we expanded our social media presence. We now actively manage Instagram and LinkedIn, and the number of valuable and informative videos on our YouTube channel has increased significantly.

Thank you for being with us!
